

SCOLVO INTELLIGENT MONITORING SOLUTIONS

Our Mission

We help You in delivering the same quality standards to your customers across all store units.

We believe that returning customers provide a unique value, that can be obtained when they find a clean, beautiful and fully stocked shop every time. This can easily be done with the **Scolvo Intelligent Monitoring Solution**, as if you were to make sure of the quality of your store network with your own eyes, every day of the week.

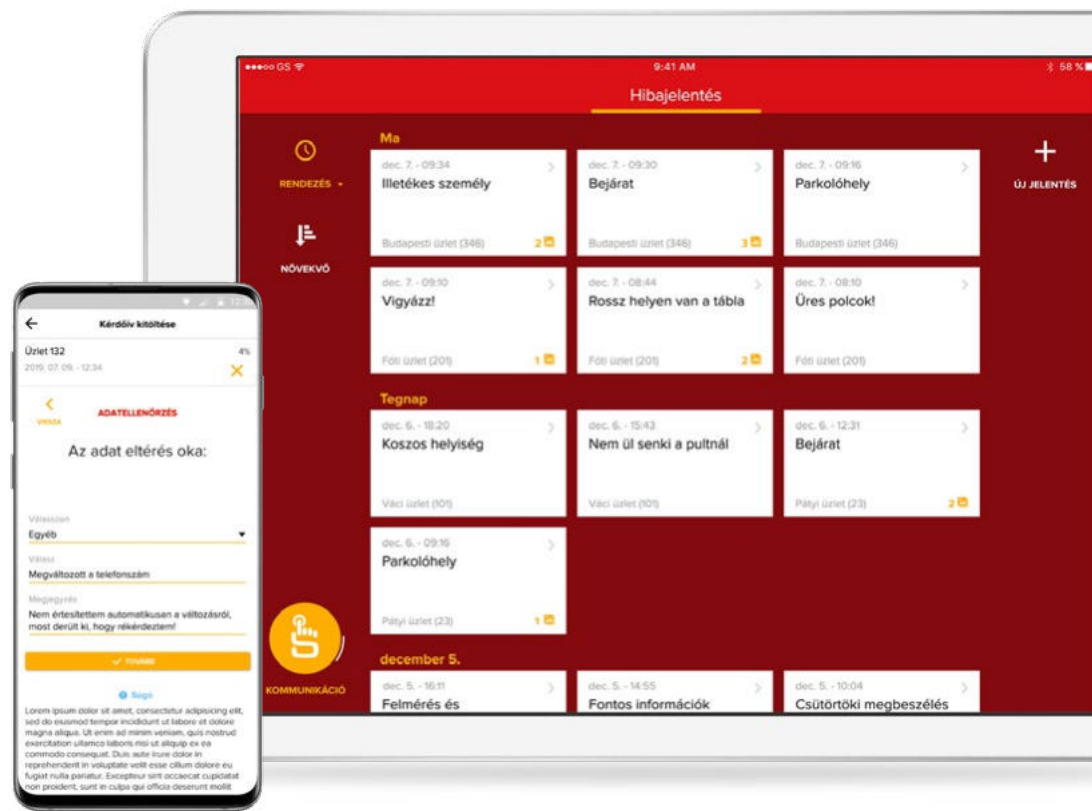

How do we support the achievement of quality control objectives?

- We provide your colleagues with a handy tool that enables them to **quickly and easily report about** on-site conditions.
- **Checkpoints** can be built into the process to help prevent arbitrary, non-real, offsite filling.
- Everything runs on a digital device, **no paper is required**.
- **Constantly updated data** can help in optimising your purchases.
- We can provide partners and suppliers with feedback and **photographic evidence** of their brand presence.
- Internal competitions, mini-campaigns can be launched and **easily adjusted on the go**.
- Ongoing optimisation: **Every step performed** during the daily use **are monitored**, from which data can be extracted and deducted about the processes in the store.

Why is Scolvo Intelligent Monitoring Solution the best choice for You?

- We help you create the **most effective monitoring flow from a variety of predefined elements** provided by the software.
- Intelligent system >> **template with branding elements**, front systems adjusted to different target groups and segments.
- Quick and easy **roll-out: 3-5 months**. In addition, since it is an “off-the-shelf” product, the **implementation cost is reasonable** compare to a classic IT development.
- With the Scolvo **multichannel solution**, you can run the program **on any device** from laptop to mobile phone.
- Daily **report are available** and any number of queries can be predefined.
